## Care

### Firmness

We make products that are built to last from high-quality materials. Though, to enjoy using them for as long as possible there are a few best practices that should be followed:

### How to clean

Do not wash the filling. Leave the wool in the cover, the filling is filled with great care and not easy to refill. And luckily this is not necessary, supplementing is sufficient. Because the outer cover is made of wool or polyester and is water-repellent, the inside will not get wet quickly. If the wool filling has become wet, wash only the wet wool by hand with lukewarm water, allow the wool to dry completely in the sun before putting it back into the fillings. If you can't reach the wet padding from underneath, leave the whole recliner outside in the sun for a day or more, depending on how much moisture has gotten into the recliner.
